

# 4 Tips for Traveling with your Vape in the UK

Vaping is in trending nowadays. There are multiple reasons why vaping is in trend. According to research, vaping is 95% safer than smoking. Vaping is helpful in quitting smoking so people are more attracted to vaping. Vaping is the best alternative to smoking. If you want to quit smoking, you should start vaping. If we talk about the UK, we can see that thousands of people just quit smoking by starting vaping. Disposable vapes are the best for young vapers because no maintenance or charging is required.

## Pick Travel-friendly Vapes:

There are different devices in different shapes. Some devices are small in shape and some are big. Small shape devices are the best for travelling. If you are planning to travel somewhere, you should carry the small shape devices with you. You can carry the small devices very easily.

If you are at the airport and you are going to travel from one city to another city then you need to follow the rules.

If you want to fly with the vape device then you must follow the rules of the specific airport. The rules vary from airport to airport. So, you just need to care about the rules at the airport.

### ● Your Vape and Its Battery:

If you are carrying a rechargeable device in the aeroplane then you will not be able to charge it. The battery in the vape could be dangerous for the others on the plane. So, keeping a disposable vape device like [elux 3500](#) with you when travelling would be better.

### ● E-liquid and Pod Refills:

You can carry small 10 ml bottles of e-juice with you when travelling but at some airports, e-liquids are not allowed to carry. If you are in Hong Kong, you will not be allowed to carry e-liquids with you. So, this thing varies from airport to airport. You have to just keep in mind that if you are travelling outside of the UK, You must keep an extra amount of e-liquid like [88 vape liquid](#) with you because the e-liquids in other countries are not very reliable. By the way, disposable vapes are the best for travelling.

## ● Disposable Vapes for Travelling:

Disposable vapes are the best for travelling because there is no maintenance and charging required in them. In Aeroplanes, there is no permission to charge your vape device and if you have a rechargeable vape device, then you will not be able to recharge it. So, [aroma king 7000 puffs](#) disposable vapes are the best for travelling, and you can use them easily too.

## ● Where Can You Vape?

If you are at the airport and thinking of doing a vape, please don't. You can vape at the airport or not, and it depends on the airport. Some airports have smoking areas, and you can vape there only. The best thing is that you should avoid vaping at the airport or any public place which is restricted. New vapers should care about this thing that where they can vape and where they not.

## ● Conclusion:

Vaping could be a part of your life if you are a regular vaper. Vape devices have different shapes. Some vapes have small shapes, and some are available in big shapes. So, if you are travelling then small shaped devices are the best for you. You can carry the small devices very easily and keep the small vape in your pocket.

Disposable vapes are the best to travel. There is no maintenance or charging required in them. If you are travelling with the rechargeable device, then you will not be able to recharge your vape device in the aeroplane. Charging your vape devices is not allowed on aeroplanes. So You must follow the rules if you want to travel with your vape device.
